Via telecon: Cliff Spencer (Lucent), Josee Neron (Stentor)

Outstanding Issue Resolution as previously discussed in June 22 meeting

At the July 17 meeting it was identified that we need to spend the first half day to resolve 2 major issues in order to proceed with requirements.

Issue #1

Definition of Effective and Activate Date and whether or not the effective date can be changed by the recipient SP?

Effective Date will equal the Activation date. Functional requirements will be developed to support both an effective date and an activation date. M&P will be developed to support both as well.

Issue #2

Determine if we are going to target requirements to the pre-port 1000 TN's all at one time, to one switch.

Final resolution that requirements will be targeted for the Pre-port of 1000 TN's, all at one time to one switch.

Process Flows and accompanying Notes.

Donna Navickas will have the new flows distributed by Thursday (7/30). Please review and send you upgrades to Donna. FYI- To view the Notes in PowerPoint click on View, click on Notes, to return to Slides, click on View, Click on Slides.

Number Pooling Schedule - Ver. 1.0

Reviewed and upgraded the timeline. Jackie Klare will have copies ready for distribution by Friday 7/31). A copy is also attached to the minutes of this meeting.

NPAC Processing in a Number Pooling Environment

John Nakamura passed out a document dated 7/7/98 that was reviewed in detail. There was a significant amount of discussion surrounding this document, which described the behavior or sub-block and subscription messages sent across the SOA interface at various points in time in relation to the block holder data.

Review of Requirements document dated 6/29/98

Minutes of July 28-31 - NANC T&O - Number Pooling Meeting, Denver

John Nakamura indicated that the numbering schema in document will be corrected for the version that we will be reviewing in Baltimore. We did not make it thru the entire document, the document will be reviewed in its entirety in Baltimore.

Next Number Pooling Meeting:

Telecon on August 21, 1-4 CDT to review the process flows. An e-mail will be distributed from the CMA with the conference bridge information.
