There is still a need to do further research to answer the question as to whether  
or not the mixed service period creates a significant harm to E911. This will be  
done with the ongoing assistance of NENA who participated in the April WG  
meeting. It was also requested of NENA that they, with the assistance of the  
LNPA WG where necessary, develop a standardized process that would  
document the responsibilities of both the old and the new service provider in  
the occurrence of a wireline to wireless port.

\par

{\b\f15 - NPAC/SMS Release Status

\par }\pard\plain \li720\nowidctlpar\widctlpar{\\*\pn  
\pnlvlcont\ilvl0\ls0\pnrnot0\pndec }\adjustright \f1\fs20\cgrid {\f15 Release  
2.0 status: With the implementation of Pooling in CA, invalid data is being sent  
in to the pooling administrator. This is causing difficulties in some pooling  
requests since they have to be rejected for valid data.

\par  
\par Release 3.0 Status: There will be a 4 week delay in the start of SP testing.  
The new date is July 31}{\f15\super st.}{\f15 ITP is not affected at this time.  
There is a conference call scheduled to discuss potential ASN changes related  
to the issue which caused the delay. Donna Navickas, Chair of the Number  
Pooling sub-team, stepped down from that position. She has taken a new role  
within her company and will not be available for the WG. We would like to bring  
to NANC\quote s attention the hard work and effort that Donna put in to the  
number pooling sub team. She has been a valuable part of the WG since its  
inception and will be missed. The Number Pooling sub team will decide whether  
or not to appoint another chair. With the implementation of 3.0, the need for a

separate team may no longer exist. Number pooling issues may be worked within the context of the entire WG meeting going forward.

\par }}\pard\plain \s19\li720\nowidctlpar\widctlpar\adjustright \f1\fs22\cgrid  
{\f15\fs20

\par Open Issues:

\par PIM 0001 - Multi- service provider process flows.

\par

\par } \pard \s19 \li720 \nowidctlpar \widctlpar \pnrnot1 \adjustright {\f15 \fs20 The OpWest team presented their proposed changes to the existing NANC process flows developed by the WG. The OpWest team will update the flows based on the discussion at the WG meeting and return to the May meeting. Further action will be discussed at that meeting. Tentative decision was made to have the WG and OpWest co-sponsor the issue at OBF for resolution of the OBF discrepancies prior to submitting the flows to NANC for approval.}

\par } \pard \s19 \li720 \nowidctlpar \widctlpar \adjustright {\f15 \fs20

\par PIM 0005 \endash Inadvertent Porting Issue.

\par

\par Worked on final definition of an inadvertent porting event and the criteria that would need to be met in order to have the NPAC facilitate the port to the previous service provider. Further discussion will be held at the next meeting to clarify the criteria and processes that will be put into place. This will involve a change to the NPAC M&P's only.

\par

\par PIM 0006 \endash NENA 9-1-1 Database Update Issue.

\par

\par } \pard \plain \nowidctlpar \adjustright \f1 \fs20 \cgrid { \cgrid0

\par } \pard \li720 \nowidctlpar \adjustright {\f15 \cgrid0 The process of updating the 9-1-1 database due to Local Number Portability should be done within a 24 hour period of NPAC activation. This would involve the old service provider performing the "unlock" transaction and the new service provider performing the "migrate" transaction within this 24 hour period. This will resolve the issue of 9-1-1 updates not happening concurrently or delays between the unlock and migrate.

\par

\par NENA also requested that the End User Move Indicator (EUMI) on the LSR be made a required field. This would also pertain to the pre-order requirements document used between a reseller and network service provider. This will resolve the issue of the old service provider knowing when to perform a "delete" transaction as opposed to the "unlock" transaction when the end user is actually changing location during porting. Process and system changes will be required by service providers in differentiating the delete and unlock transactions based on entry in the EUMI field.

\par

\par For further information, please refer to NENA Recommended Standards for Local Exchange Carriers, ALI Service Providers & 9-1-1 Jurisdictions (NENA-02-011), Section 22--Standards for Local Number Portability, paragraphs 22.1 to

22.22, adopted in June, 1997, revisions
