WTSC – Conference Call - July 26, 2001

New Items since last conference call
- Jim Grasser (WNPO) made a presentation on our behalf at the CTIA meeting last week in Baltimore, MD to invite new providers to WTSC meetings. The Rural Cellular Association (RCA) expressed interest in working with us on testing. They are holding their own WNP meeting in Dallas on Aug 28-29. To find the agenda, go to www.rca-usa.org and click on "meetings".
- WNPO has sent out letters to vendors inquiring as to their WNP compliance dates. There has not been much response back to date. If certain vendors are preventing carriers from testing, we will discuss with the WNPO to work on the issues.

Documentation – Section 4.0
- The ad hoc team held a meeting on 7/13 to work on this. Teresa Patton will send me the update today or Monday to be sent out to the team. Please review this before the meeting and have questions ready.

GTT Test team
- There has not been any new updates to the GTT test team. There are some contributions that will be sent out to the team as resources to work on test cases. GTT test team will meet Monday, August 6th from 1-5 PM.

Test Markets & Dates
- We are requesting that carriers bring information to the Denver meeting on test coordination. It does not have to be final information, but we would like to generate some discussion between providers as to where people want to test, how many numbers, how long they will need per MSA, etc. This will be discussed most of the 2nd day.

Other Action Items
Documentation review –
- Please review the documentation that has been sent out regarding the test plan. We will resend the documentation for everyone again if they do not have it. We need to get most of these issues resolved and finalized at the Denver meeting so we can move on to the test coordination and procedures.
  - Topics to review (drafts will be sent separately)
    - Section 4.0 - standardization of language
    - Section 4.3 - clarify language/intent for test cases on roaming wireline calls
    - Adding test cases for "ported from" scenarios
    - Documents linking test cases together

Walk on items
We will start looking for hosts for next year's meetings at the September meeting. Please check with your company on availability and preferences.
